

Saturday evening, October 14, 2023, "A Day Interconnected by Divinity"

Email Text

Thank you so much for joining us for A Day Interconnected by Divinity. This time, we will reflect on the state of our hearts and minds in light of world affairs. Specifically, we will harmonize our inner disharmony, and with a harmonious consciousness, we will radiate a greater light and utilize it for the greater harmony of the world.

Let us look at the world situation by picking up only objective facts. Then, the situation is such that it could be tilted in the direction of a major war. In all of these situations, the feminine nature that both men and women possess has been pushed to the background, and the "shadow side" of the masculine nature dominates the situation. In other words, they are situations in which the Inherent Divinity has been pushed to the back of the mind.

"feminine" and "masculine" are inherently present in both men and women. However, in most cases, masculinity tends to appear more prominently in men and femininity in women. Another point to remember is that each characteristic has "substance" and "shadow. These can be summarized as follows.

- *The substance of masculinity: Courage and strength backed by love.**

- *The shadow of masculinity: Aggression and dominance.**

- *The substance of femininity: Compassion and nurturing power.**

- *The shadow of femininity: Insidiousness and excessive patience.**

That is only one way of looking at it, but the reason why humanity has never stopped fighting is due to the imbalance between masculinity and femininity in the heart of humanity as a whole. The key to solving this, as you all know, is none other than Divine Spark.

So, after looking at the facts this way, how can we activate the feminine in all humankind? How can we bring it into balance with masculinity? The key lies in the way we use our brains.

The human brain comprises the cerebrum, cerebellum, and brainstem. The cerebrum is responsible for consciousness, thinking, and information processing. The cerebrum is divided into the left and right hemispheres. The left brain is responsible for logical thinking, such as language and calculation. The right brain

controls intuitive awareness, such as images, memory, and inspiration.

Let us superimpose the nature of masculinity and femininity on these left and right brain functions. You will notice that the situation in which the right brain has been put to sleep corresponds directly to the situation in which the feminine function has been relegated to the back of the mind.

The key to restoring the right brain to normal functioning is to accept everything we see, hear, and feel through our five senses as it is, without using left-brain thinking. It is to practice doing this. It is akin to a camera just capturing and recording facts.

Saturday night will be like that, a silent embrace and compassion without criticism, condemnation, or evaluation of the "shadows of masculinity" making their last bad attempts worldwide. That is to fully demonstrate the motherhood inherent in both men and women and be clearly aware of the revival of femininity.

Of course, the "feminine nature" is inherent in us men and women. Therefore, men can also unleash the power of great harmony by harmonizing their inner natures without being shy about it.

Saturday evening, October 14, 2023: "A Day of Sacred Connections" Opening Remarks

Hello, everyone. We will start the Zoom Prayer Meeting.

In my email on Thursday, I wrote that masculinity and femininity each have a substance and a shadow and that the world's infestation of combativeness is the shadow of masculinity about to appear and disappear.

However, even though the Guardian Deities and Spirits have gone to great lengths to erase such a situation if the human beings living in the present time become enraged with hatred and anger, and if they keep the thoughts of dividing themselves and others into friends and foe in their minds two or three times, the chain of hatred will not disappear but will remain. It casts a dark shadow over the future.

In such a situation, there are people from various standpoints in the world. They are working day and night to stop conflicts and wars and move toward peace. The various measures these people take are generally aimed at calming down the situation on a worldly level. It can be said that they are symptomatic.

Therefore, while respecting such various ideas, we would like to focus on the real cause of the problem and walk the path that will bring about a true solution.

We must first draw out the "substance of femininity" that lies deep within our hearts and then live by manifesting it on the surface of our consciousness. Putting this into practice will neutralize the disturbing thoughts of the "shadow of masculinity," which is convinced that fighting for survival in the relative world is necessary.

You may think, "What a load of crap," but our prayers and IN are not tools for wish fulfillment. Our prayers and IN are not tools to move others to do what we want, like trying to stop wars and conflicts with uncontested humanity.

We are creating a world of great harmony by exercising the divinity equally inherent in humanity, thereby demonstrating our infinite variety of powers ahead of humanity.

We are not praying and performing IN to stabilize unstable countries such as Israel and Palestine, Russia and Ukraine, Azerbaijan and Armenia, Afghanistan and Myanmar, Africa and Latin America.

We are just sending Divine Spark light and praying for the accomplishment of our missions, in cooperation with their guardian spirits and guardian deities, so that the people living in those countries and regions can remember the Divine and live in harmony of their own volition. I am only praying for our missions.

Today, we are aware that we are not praying to change the situation but to reaffirm that we are radiating the Divine Light of Life like the sun and that we are working like the earth, water, and air to keep everything alive and let us work on the following.

Take a good look at all the conditions that pertain to the earth. We will also look over our various feelings toward them. At that time, look at all the thoughts floating in your mind like a flowing cloud. Then, we release the "light that makes the best use of and nurtures everything" that transcends dimensional barriers.

It's time to begin the World Peace Prayer in English and Japanese. After that, please close your eyes and meditate for one minute, placing your consciousness in Divine Perspective. And when I say, "Hai, arigatou gozai-masu," open your eyes. Then let's get started.
