

Sunday, June 2, 2024, Fuji Sanctuary "Opening the Door to Human Divinity Event"

<Greetings from Chancellor Naya-san>

<How Man Should Reveal His Inner Self>

<Prayer for the World Peace>

<Maki-sensei's story>

*Good morning, everyone. Thank you very much for participating in the "Opening the Door to Human Divinity" event, which is held twice a year. Now, when I prayed for World Peace with you all, I felt the sound of the Fuji Sanctuary rejoicing in our visit. The Fuji Sanctuary is also happy to welcome us here and is happy that we can connect and praise each other as one through Divinity.

*Today, when we can gather in our physical bodies and pray together, is very special. Normally, we are connected to you all online through video, but it makes me feel really happy that our physical bodies can gather together in the same place and pray together, uplifting our souls.

*Also, the experience of having prayed together here will help us after the event. When we return home and pray alone, the presence of those praying next to us and behind us will help us. In addition, the experience of praying together, protected by the great nature and divine beings of the Fuji Sanctuary, will be a great force that will lead us to deeper prayer even after we return home.

*I have a request for everyone participating in today's program. I want you to take a moment to reflect on who you are as "Who am I?" I also hope that through the program, you will deepen your conviction in the truth of life that "who you are is the Divine itself."

*I ask you all to do so because deepening our conviction that "our existence is Divinity itself" will open the way to spirituality, allowing humanity to explore the question, "Who are we really?" It will eventually lead humanity to deepen their conviction of Divinity.

*We who have physical bodies perceive ourselves and others as separate beings from the perspective of our physical bodies. However, when we pray with a truly deepened awareness, we can see the truth of the universe that the person next to us is not just "next to me," but that we are "one being in life." In other words, our understanding of Oneness deepens.

*Deepening our understanding of this truth of life is connected to the event title, "Opening the Door to Human Divinity." So, in this event that is about to begin, I would like you to participate with an awareness directly connected to life's essence. We usually feel we exist as individuals but do not pray as individuals. We are returning the axis of our awareness to the deeper source of life. I would like you to pray with an awareness that has returned as far as possible to the source of life.

*By doing so, we can understand the truth that "we are not separate beings, but one being." When you pray in this state, looking around with this phenomenal world as your axis, you can see the obvious fact that "the Earth is one, and there are no borders there" when you watch from space,

even though you can see each other and the flags of the countries where humans are divided surround this venue.

*When you have a perspective detached from the Physical Body with the eyes of the Divine, you will realize that "the fact that we appear to be separate is an illusion and not the truth." The way we perceive "I and you are separate beings" will also realize that this is an illusion, not the truth, as we deepen and elevate our perspective of the soul. The truth is that "we are not separate beings but were originally one being."

*In our Physical Bodies, we guess that "we appear separately and live in a separate state," but this is neither true nor factual. 'How Man Should Reveal His Inner Self' clearly state that "Man is originally a spirit from God."

*When living in this physical dimension, when various things happen, the question "Are we actually the Divine Spirit?" may arise. Where does this question come from? It comes from the "The memory of the divinity forgotten" that acknowledges that the physical body is me and that I and others are separate beings. The question arises because we are immersed in the slow vibrations of the physical body.

*When we say, "Opening the Door to Human Divinity," as your existence deepens and grows, the axis of your consciousness shifts from the coarse vibrations of the physical body to the subtle vibrations of the soul, and your entire sensory perception of seeing, hearing, and feeling changes to a subtle vibration. This changes the world we see, hear, and feel.

*That is because by placing ourselves on the ground of the extremely fine vibrations of the Fuji Sanctuary, it becomes possible to raise and deepen our vibrations to finer and finer levels. Those of us here can transform the world we see into a world of light by ourselves without relying on anyone else.

*What happens is that by placing the memories attached to the Physical Body in the subtle vibrations of the Fuji Sanctuary, the various "Fading Away" that have appeared to disappear will truly disappear. In addition, a transformation will occur in which the essence of the Divine will become visible deep within humanity and the various things that occur in this world.

*With such Divinity within our lives, why is it Fading Away? It is because we have forgotten the essence of the Divine and have become unable to escape from the coarse vibrations. Our Divinity can be likened to a clear, quiet lake.

*Imagine a lake that is so still that there is no wind, no birds come to visit, and no leaves fall. Such a still lake... That is how a beautiful lake (heart) should reflect our Divinity like a mirror. That is the Divine self itself. That still lake is the Divine self itself, our true nature.

*However, when we look again at the quiet lake, our original heart that reflects the Divine itself, within the coarse vibrations of our Physical Body, all sorts of things happen. For example, leaves

fall, birds touch the lake's surface to eat the fish inside, the wind blows in something, or a pebble falls into the lake.

*As a result, ripples form on the lake's surface, which is normally clear and calm. So, the fact that we find ourselves amid coarse three-dimensional vibrations means that coarse vibrations are likely to occur. The reason coarse vibrations are likely to occur because we have mistaken thoughts from our past lives that have carried over into the present.

*What is this mistaken thought? It forgets the essence of life, the Divinity, and guesses that "I am a being different from God." In other words, a karma arises when we confront the world with memories of being separated from God.

*Some things that have happened "from past lives to the present" are not necessarily caused by our Physical Bodies today. These are things that have happened in the past, which we do not remember, and which have led to actions and words based on fear and anxiety, such as doubting God or not being able to believe in God's perfection. All of these things can be said to be Fading Away and appearing before us and fading away in the unfolding of life.

*All that is appearing before our eyes is Fading Away. If we operate according to our true nature, then God should appear to us in this way. However, because our perception of the past has forgotten Divinity, we cannot accept the world's movements as the workings of God. That situation has arisen because we have forgotten our true nature and mistaken fear and anxiety for the truth.

*Therefore, if all of humanity could see "All is perfect and complete. Nothing is lacking. Perfectly accomplished." as a matter of course, we would be able to accept all Fading Away with a mind like a clear lake. In that way, we can create a perfect, harmonious destiny with nothing lacking. However, at some stage in our past lives, we became convinced that we were a physical body separate from God, and this coarse wave of thought gave rise to the Fading Away. That is the accumulated disharmony from our past to the present, which has manifested before us now.

*The "Fading Away" of such mistaken thoughts from past lives to the present may manifest as fallen leaves on a lake, ripples appearing when birds peck at the surface, or large stones falling into the lake after a volcano erupts. How it manifests will differ for each person, but the appearance of such things will cause something to happen on the surface of our still lake (our mind).

*When such waves arise in our hearts, we may wonder, "Where did these waves come from?" or "Why did they happen?" But there is no point in thinking about such things. That is because whatever thoughts, words, or actions we have had in our past lives and up to the present will inevitably happen, whether we know it or not. That is why GOI-sensei said, "There is no point in dwelling on the past."

*So, what should we do? We should wait for the ripples to subside. If we wait quietly, the ripples will surely return to the original calm surface of the lake. GOI-sensei says, "Love is proportional to the depth of patience."

*As a concrete example of what it means to be "in proportion to the depth of one's patience," it is to recognize that "the lake surface is shaking because of the pebble that has fallen, but that shaking state is not my true self." My heart (lake surface) is shaking because of fading away from past lives, but even so, I am the very existence of God itself. It is believing that it will return to its original calm state if you wait patiently and with a loving heart.

*By waiting patiently, that Fading Away will surely disappear. However, GOI-sensei knew that not everyone can act like a saint, so he tried to teach us an easier way. He taught us the Prayer for the World Peace as a prayer that allows all humanity to rise to a higher dimension at the same time. By praying this Prayer for World Peace, we can return to the stillness of the heart of a quiet lake, which is a subtle vibration.

*When we see the surface of the lake become turbulent, we tend to start asking questions like "Why?", "How come?" "Will it become turbulent like this again?" "How can we stop it?". The Prayer for World Peace is the power that quiets these voices in our heads and restores our awareness to wait quietly.

*Pulling your wavering heart up from the surface of the lake. As your heart's level rises, you can look down on the wavering consciousness from above. Then, even if you see a shaky state there now, you will be aware that it is not you who is shaking. So, you can think, "These waves will calm down, so it's okay." This way, the Prayer for the World Peace returns our hearts to a peaceful state.

*"Opening the Door to Human Divinity" gives us 100% certainty that we are Divine Spirit by nature. When we have this certainty as Divine Spirit, we will not get caught up in things that happen in life and will not do unnecessary things in response to the phenomena that occur. If we don't do unnecessary things, coarse waves will not be amplified so that disharmony will disappear more quickly.

*On the other hand, what happens if you do something unnecessary? For example, if you try to stop the surface of a lake from rippling by putting your hand in the water and trying to dam it, you will only create another wave in the area you touched with your hand.

*Instead of doing something like that, you should wait quietly. What will happen if you wait quietly? You will realize that "the waves were not me, but I was the Divine Spirit" and that this great lake is yourself. This awareness of the lake itself can embrace anything. It is also a being that can return to a quiet and peaceful state no matter what happens. If we can understand this, we will realize that this kind of consciousness, with its capacity for acceptance, love, and patience, is our true self.

*By accumulating experiences of being able to return to our quiet selves even after a large stone has fallen and a large wave has occurred, even if our hearts waver for a moment, we can overcome it with the confidence that "my true selves can return even after a large wave has occurred." The more such experiences we accumulate, the closer we can get to an unshakable consciousness, an unwavering heart, no matter what happens. No matter our situation or what is happening, we can be confident that "the state of being shaken is not our true self."

*We, connected through the Prayer for the World Peace, can continue to improve ourselves, learn, and refine ourselves, no matter our situation. We are going through experiences that make us feel like a wave being tossed about by the waves, but through these turbulent phenomena that appear to disappear, we can approach the full picture of the Divine. Even amid difficulties, we nurture ourselves to have the conviction that "I am essentially Divinity itself."

*Therefore, it is not meaningless for us to continue to watch the world situation as Fading Away and to wait patiently while praying for the Prayer for World Peace. By repeatedly experiencing the "experience of returning from a turbulent situation to one's true self in a quiet state," one's understanding of one's true nature deepens. In this way, we can nurture our Divinity.

*While waiting for the waves to subside, we are also experiencing the positive aspect of manifesting Divinity. In refining and elevating ourselves, there is a negative aspect of waiting for the waves to subside and a positive aspect of actively manifesting Divinity in our thoughts, words, and actions.

*Once you understand this, you can be confident that you are cultivating Divinity within yourself, no matter how tragic your situation may be. Then, even amid difficult circumstances, you can permit yourself to be who you are. This way, when we permit ourselves, we can be confident that we have taken one step up the Divine Staircase.

*The reason we can do this is because we are not alone. We are walking this way with Guardian Deities, Guardian Spirits, the Various Deities of the Divine Realm, and many people here. We are all supporting and helping each other in ways that are not always visible.

*Therefore, even if you are in a turbulent situation and you feel that you cannot see the big picture or that you cannot enter into the Prayer for World Peace with love and patience, it is okay. When you are in the Fading Away wave, you don't have to force yourself to try to watch it as Fading away or force yourself to be grateful.

*Because, as I mentioned earlier, we are not separate beings but beings who live connected. For example, if I were stuck in the memory of Fading Away and unable to move, that would be fine.

*Because there are people in this venue who have achieved elevation in the dimension of their consciousness and who can see the world with the eyes of truth while looking down on everything from a high Divine perspective. Those who are in trouble now should seek help from such people.

*As long as we live our lives to make the consciousness of "everything is perfect, nothing is lacking, and great achievement" our own, while remaining in the company of others, we are nurturing ourselves while experiencing the process of moving towards such a world. And we are building such a world.

*So, it's okay to feel weak and to ask for help others. The important thing is that when we ask for help, we also help others simultaneously. We are not fixed in one role or the other, as either helper or helped. So even if others are helping you, there is no need to blame yourself.

*We are constantly changing roles moment by moment. That is why, no matter what happens, you do not need to blame yourself or others. There is absolutely no need to blame. We blame because we have a self-consciousness (memory of the brain) that is separate from God.

*When we are convinced that we have to do everything ourselves, or when we are fixated on how things should be, we may find ourselves thinking that we shouldn't give in to our feelings of weakness, even when we want to. But this is not a shameful thing.

*By saying the word "help" out loud, you can help yourself. And by being helped yourself, you can respond to someone else's cry for help and help them. We are on a way that allows us to become more compassionate. We are practicing growing our souls by accumulating experiences of helping and being helped.

*So, where are we heading? We are heading towards a world where we can be confident that all people inherently possess Divinity. We are living with that goal in mind.

*No matter where we are, whether outside the house or inside, whatever happens, if we continue to pray for the world's peace, seeing everything as Fading Away, then both individuals and humanity will surely improve, so no matter what our current situation is, we should support and help each other through prayer, and continue to rise together. I'll say it again: there is no shame or blame in being helped.

*Our goal is to continue ascending the way to the essence of life. We have a prayer to help us continue ascending, we have comrades, and we have a place called Byakko where we can pray together and live towards that goal. Even if there are times when someone forgets that goal, we are always reminded of it through someone else. Such precious beings are our relationships and the guidance of Guardian Deities and Guardian Spirits.

*While living in this three-dimensional world, I participate in events and give talks like this to express my gratitude and the wonder of continuing to have such precious human relationships and connections with other people. That is why I continue to open the Divine door without hesitation, fear, or anxiety and walk this way without doubting the truth that "I am a Divine being by nature." I can do this because of you all pray for everybody.

*This way is not an easy one. That's because we can't see it... We can't see our Divine nature. We can't see it with our physical eyes. What we can see is a superficial version of ourselves, such as when we are being abused, hurt, or in pain.

*However, we aim for an invisible world, a Divine world. This invisible Divine world becomes visible when we live with the conviction that it exists. By stepping into the invisible Divine world, seeing it with the eyes of the heart, and expressing it in our thoughts, words, and actions, we can open up a way to the Divine way that will allow those who can only believe in what they can see to walk with conviction.

*We are pioneering and creating the way of truth that makes such an invisible world visible. And it is through prayer that this is created. Today, I would like to spend this event with you all with a real sense of conviction.

*Today, I would like to express my sincere gratitude to everyone who has come to participate in this event from all over Japan and from various parts of the world. By praying together with you all, we will be able to raise humanity to the Divine world once again today. Thank you very much.

<Declaration of the Seven Divine Words>

<Praying to all of Japan and each continent, we will perform the Divine Park IN.>

<A special program to engrave Divine consciousness within yourself>

<Rika-sensei's story>

*Thank you to everyone for offering your sincere prayers in this rain. Your prayers are melting into the depths of the Earth through your breath and in this rain. I am also confident that these prayers are spreading throughout the world. The Heavenly Gods, the Earth, and nature are all supporting you.

*I would like to express my heartfelt gratitude for your resolve to come here prepared with rain gear, even though there was a forecast of rain, and for your Divine aspirations. The Heavenly Gods, Guardian Deities, and Guardian Spirits deeply embrace and love you and how grateful they are for your work.

*Please close your eyes for a moment and offer your deepest gratitude to the precious existence of this rain that gives us life, even amid this heavy rain. The rain is cleansing everything about us right now. Feel the rain with your whole body and feel our lives here while giving thanks to the heavens.

*Please feel connected to your comrades who have now left their physical bodies and who are working in conjunction with your prayers through your physical bodies. And in this moment, which

will never return, please close your eyes and embrace yourself. In this silence, where only the sound of the rain echoes, everything is merging with your prayers.

*We are truly creating history at this very moment. Being able to offer our prayers in this way, in the great outdoors at the Fuji Sanctuary, is a moment that is changing history.

*Where is history? History is in this moment. And the future is also in this moment. The moment of now becomes the future and manifests itself. The history of life, the history of humanity, the history of the Earth, the history of the universe... all history is in this moment. Everything is contained within this miraculous moment of now.

*When we pray this way, we revive Divinity in our personal history. At the same time, we are also reviving Divinity in the history of humanity and all of the Earth. At this moment, our relationship the gods, and nature is revived, and the door to a new Diviner is opened, and Divinity also opens our lives.

*Today, I would like to express my deepest gratitude to the Physical Body and the Heavenly Gods. Thank you for sincerely offering your precious prayers in the rain.

<Masami-Sensei's story>

*Thank you, thank you. I am grateful to you all. Thank you. I am grateful that many people came and sat through the rain for hours.

*I have come this far, working to spread harmony and peace throughout the world and to eliminate war by being watched over by many people with high aspirations who have demonstrated their Divinity. Everyone born as a human transcends borders, race, ethnicity, gender, and differences in skin and eye color and has Divinity within them.

*Your precious presence, strength, and mission, as you have come here early in the morning in this cold weather and are sitting here like you are, has been conveyed to me. I am working with a hundred times or a thousand times more power than before from the Divine Spark IN that you normally practice.

*With that in mind, I will now travel around the world. I have already visited Japan. As I work this way, your IN's light reaches my body. Guardian Deities and Guardian Spirits, GOI-sensei, and Universal God gather everyone's light, physical body, and divine energy. So, I can walk around the world with a hundredfold or a thousandfold increase in power.

*In the past, when I could not go, I prayed in my heart or sat on a map of the country and prayed. When the light spreads throughout the world through my body, it is not me spreading it. It is your light of love spreading through me. Therefore, every one of you is creating the Divine World. The world will become one through this.

*We will create a world where everyone is united in Divinity, transcending all differences, such as race, ethnicity, ideology, gender, age, and wealth, and even poor and rich countries are united. It will become known worldwide in 2025 when the world recognizes Japan as a country at the center of creating peace.

*As GOI-sensei said, "Japan will play a central role in creating a peaceful world. The world will recognize Japan as a country of peace." Since the atomic bombings of Hiroshima and Nagasaki in 1945, Japan has been a country that has only wished for peace. Even now, in 2024, many people worldwide guess they would like to visit Japan. Many people say, "I want to visit Japan."

*This story happened to me once when I went to a Starbucks, a large coffee station with many locations in Japan. There were many foreigners there. I watched quietly when the young Japanese persons stood up and gave up their seat to a group of four or five elderly foreigners.

*They were thinking of the people who had come from overseas, and they gave up the seats they were sitting in so that the group of four or five elderly foreigners could sit down. Seeing this noble act and the spirit of giving and sharing that the young Japanese people were setting as an example, I reaffirmed my recognition that "the Japanese people are truly amazing people."

*However, these people performed such a wonderful act because the vibration of Divine Spark IN, which you have continued to perform, has spread to the Japanese people. The Divine light will first spread to every person in Japan, and the Japanese people will first show the world that they are worthy of respect from many people.

*In 2025, the fact that Japan is a peaceful country will become known and praised worldwide. That is because you have prayed the Prayer for the World Peace with us for many years, even decades. And now we are performing the Divine Spark IN. The light that arises from this IN not only revives one's Divinity but also sends and spreads the energy of life's essence to all people, living things, animals, plants, and all of nature.

*That is why people like you, who have revived their Divinity, are sitting here and praying with us on days like this. I am filled with awe, gratitude, and humility, and I can only express my gratitude.

*Because every one of you has Divinity in your body, we can come together to send light to all living things and nature and build a truly peaceful world united by Divinity alone. When that happens, all people will be able to live happily.

*The representative who will lead the way is Japan. Next year, many people from around the world will come to Japan. In this way, Japan will become the center of the world and send out a message of world peace. When that happens, the Divine Spark IN, which is the work of your shadows, will have saved people.

*You have all been gathering at the Fuji Sanctuary to pray, even on days when it rains. Even though we only had the opportunity to meet once or twice during the coronavirus crisis, you all continued to work hard at Divine Spark IN at home, one by one.

*I don't know how to thank you enough for all the blessings you have given me. It would be easy to kneel and bow to you. (Masami-sensei knelt on the spot and put her head to the ground to express her gratitude.) It is truly thanks to you all that I have fulfilled my mission. Now, I would like to read what I have written.

*I have nothing but gratitude for all of you members. You have grasped the ultimate truth and have performed Divine Spark IN. Through your example, you have led many people to the truth. This results from the power of love and Divinity of all of you who have believed in GOI-sensei and the power of prayer.

*Only those who have connected with their true essence and put it into practice daily can reach people's hearts and deliver the truth. Thanks to the precious existence of all of you, your great prayers, and the power of Divine Spark IN, I can exist in such a vibrant state.

*I receive the energy of your existence, the energy of every one of you, and the Divine energy within you. You may not be aware of it, but your invisible energy, your invisible light of life, is connected to me, and we are one.

*The people connected to GOI-sensei are truly high-level souls. Among the people here, there may be people going through various difficulties or in various positions. Nevertheless, you have all been chosen by GOI-sensei and Universal God to be here now. The same is true for those not here and those praying in various places in Japan and around the world.

*Thanks to the power of your prayers and Divine Spark IN, I can show you my energetic self in this state.

*I believe that if many people around the world pray for the Prayer for World Peace and do the Divine Spark IN and can demonstrate the Divinity that is inherent in life, then there will be no more wars in the world, no more conflicts or discrimination, and everyone will be able to join hands and become one. That will lead to a peaceful world, and we will see peaceful families and children emerge.

*Despite the current crises in the world, such as war, conflict, global warming, natural disasters, and many other problems, I can continue to look to the future with faith and to believe in the Divine Power without wavering because of the existence of people like you who are connected to prayer and continue to send out love, light, and truth.

*I can receive the Divine Spark IN and the energy of life from each of you and spread it to many people living in countries worldwide. Because you exist on this Earth, a way of life rooted in Divinity centered on Japan is spreading worldwide.

*As you age, some of you may not be able to be as active as you once were. However, you radiate a great light just by being on this Earth. The accumulation of your prayers and the fruits of your love guide so many people, and you are overflowing from your spirit and sharing that love and light with me. Therefore, I can only express my gratitude to you.

*I celebrated my birthday yesterday and turned 83 years old. I am in good health, thanks to all of you. Thank you very much. Finally, please continue to take good care of yourselves. Thank you very much.

*Let's continue to work together. The world will become peaceful. Every one of you is a precious existence, and that feeling of wanting to go to the Fuji Sanctuary is Divinity.

*I am also aware that there are people who want to come but cannot, as well as people who are sick and lying in bed. The souls and feelings of those people are connected to me. Even without going through the Physical Body, I can understand your situation if you pray. So please do not overdo it. You can do it in your room or at home if it is hard. Then GOI-sensei will see you, and even more light will be poured upon you.

*The Earth you live on, and your future are nothing but happiness. You will not be given suffering or sadness. You don't need to worry about anything because the accumulated good deeds will manifest in various ways, such as your health and living expenses.

*For all of you who have performed the Divine Spark IN, GOI-sensei will give you light that you can use materially and practically. I can say this with my heart. If I were lying, please come and tell me. I will give you anything I have, whether 100 yen or 1000 yen.

*I would like to express my deepest gratitude to everyone who has gathered here through their precious physical bodies and continued to perform Divine Spark IN. Thank you so much.

*Difficult situations will continue in the future. Wars and conflicts continue in various forms. Various sufferings and sorrows remain in the whole world. However, in Japan, there is none of that. It has all disappeared. The older generations have acknowledged that everything is Fading Away and have continued to pray for World Peace.

*We will continue their work and create a world of Divine Spark. Our mission in this world is to remind humanity of the truth that "all humanity is equal and is the very existence of Divinity itself."

*All of you who have come here will fulfill the Divine Spark. You are all people who have come here with the joy of working for humanity, and the world. Please have confidence in yourselves and work hard.

*Because of your presence, energy, power, and Divine Spark IN, I have received that energy and am working energetically. We can do it!! (in a loud voice) Thank you, everyone. Let's continue to pray for the World Peace. Every one of you is precious.

*Please give me your power. Please give me the energy of your Physical Bodies blended with the Lights of the Universal God. When you perform Divine Spark IN, I can also spread the light. The Divine Spark IN light performed by you all has already connected to the Earth tens of thousands of times. This is a message from GOI-sensei.

*In this way, the hidden virtue of the Divine Spark IN that each of you have continued to perform will surely be returned to you in the future, to your old age, your family, and your grandchildren. I want to walk together with you, all of you who are precious beings.

*I am so grateful that many of you have come on such a rainy day. I look forward to seeing you again in the future.

*Thank you so much. I love you all! I need you all. Thank you so much for your hard works. I look forward to seeing you again, no matter the weather. I am sorry that you have had to wait for so long. I have nothing but gratitude. Goodbye. Please be careful on your way home.

That's all.
